

DVD PRODUCTS

RouteDVD

RouteDVD is our conventional DVD production featuring route footage along with user graphics and commentary as required. Each disc has a menu of contents allowing the user to select the required scenes easily and on demand. This standard production is favoured by those intending to use an ordinary domestic player with TV screen, plasma set or view via a computer.

Conveniently packaged for easy use and reference, the **RouteDVD** is recorded in UK-PAL format for maximum compatibility on all UK domestic DVD players. The film is recorded in HD format to provide the highest quality of playback on modern HD plasma screens.
