

DVD PRODUCTS

TrainingDVD

TrainingDVD our film production facilities offer a cost effective DVD production for rail training. Our experience of railway and line side work is coupled with an ongoing understanding of the requirements of the rail operations and training environment. Our film making environment allows us to work closely with trainers to develop a storyboard, script and final production to their exacting requirements.

Recording in Sony High definition we are able to offer services inside and outside rail vehicles, both within the servicing areas and out in the customer zone. Final production and editing in our studio, we offer a full range of sound and audio enhancement. We have a range of final delivery options for mass production of DVD's including artwork and cases. We can also arrange to upload productions to the internet and host internet delivery.
